Question 1A

    i.   Display the names (sname) of the suppliers who sell red parts which cost less than a 100.

    ii.   No return value/table. This is because since sid is projected it is the only field and hence you can not project sname from that.

    iii.   Display a list of names (sname) of suppliers sell both red parts and green that cost less than 100.

    iv.   Display the ids (sid) of suppliers who sell both red parts and green that cost less than 100.

    v.   Display the names (sname) of suppliers who sell red parts that cost less than 100 and green parts that cost less than a 100.
